

- Where is your group currently in the engineering process:

We began our weekly scrum today, we will focus on the final most important tasks for reaching our requirements for the project to maximize our points and completion of the game. (needs a minigame /sidegame)

- What were your project's goals for the previous week?

Our goals evolved throughout the week, and these were the accomplished ones.

We fixed multiple issues with code documentation, added music and an options menu to disable it. We added pictures of trump on the main menu, added more jobs, and fixed the reset highscore menu.

- What unexpected challenges did your team encounter this week?

Getting an image to display only on the open page, rather than all pages.

- How did the team respond to the challenges?

We talked about it and figured out how to fix it by some ingenuity and the power of google

- What changes has your team implemented this week to improve its coordination and its responses to future challenges?

Coordination and responses to challenges are already going well, still just messaging on facebook group chat, and in the message window on the google docs we are using.
